🔗 Portfolio

ABOUT

Software QA Engineer with 2+ years of experience in functional, API, security, and test automation. Worked across web and mobile products in fintech and enterprise domains. Comfortable handling the full testing lifecycle from writing test cases to reporting bugs and supporting developers through fixes. Strong believer in quality over speed, with real hands-on experience in Selenium automation and OWASP-based security testing. Enjoy working in Agile teams and take ownership of QA processes end to end.

PROFESSIONAL EXPERIENCE

Singularity Limited, Software QA Engineer

01/2024 – Present

- Design and execute test cases for web and mobile applications.
- Perform functional, regression, API, performance, and security testing.
- Develop and maintain automation scripts using Selenium WebDriver (Java).
- Conduct API testing using Postman and performance testing using JMeter.
- Perform vulnerability assessments and security testing based on OWASP Top 10.
- Track defects, verify fixes, and collaborate with developers in Agile Scrum environments.

Projects: Brac Bank Website & Product Selector, Passport Appointment Scheduler & Biometric Collection Portal, Nagad Systems, B-Charge App, ERP Solutions, & Leads Management Systems.

Bdjobs.com Ltd, Jr. Software QA Engineer

01/2023 – 01/2024

- Designed and executed automated test cases key workflows with Selenium.
- Conducted API testing with Postman and maintained structured test collections.
- Performed load testing with JMeter and security testing for web/mobile apps.
- Reported defects, vulnerabilities, and performance bottlenecks; improved release quality.

SKILLS

QA Skills

- Test Planning ,Test Case & Scenario Design
- Requirement Analysis
- Functional & Regression Testing
- Integration & End-to-End Testing
- API Testing (Postman)
- Performance Testing (JMeter)
- Test Execution & Result Analysis
- Root Cause Analysis,
- Test Reporting & Documentation
- Agile/Scrum Collaboration

Cyber Security Skills

- Web Application Penetration Testing
- Vulnerability Assessment
- OWASP Top 10
- Security Testing
- OSINT, Digital Forensics
- Offensive Security
- Client-Side & Server-Side Validation Testing,
- Authentication & Authorization Testing
- HTTP Traffic Analysis
- CTF Challenges

Tools & Technologies

Selenium WebDriver, Postman, JMeter, ClickUp, Jira, BrowserStack, Swagger, MongoDB Compass, MySQL, Kali Linux, GitHub, Cursor AI, Burp Suite, Nmap, Acunetix, OWASP-ZAP, Autopsy, Wireshark, NetworkMiner, Chrome DevTools, Figma, Canva, Microsoft Office Suite, AI-Assisted Testing, Prompt Engineering, Vibe Coding.

Web Technologies & Programming

- HTML/CSS(Basic)
- MySQL
- Python (Basic)
- Java

EDUCATION

UITS University of Information Technology & Sciences,

2023 | Dhaka

B.Sc in Information Technology (IT)

- CGPA: 3.22/4

Bogura Govt. College

2019 | Bogura

Higher Secondary School Certificate (HSC)

- GPA: 3.75/5

Uthali High School

2017 | Bogura

Secondary School Certificate (SSC)

- GPA: 4.91/5

PROJECTS

Passport Appointment Scheduler & Biometric Collection Portal, *Associated with Singularity Limited*

As a QA, performed functional, API, integration, and security testing on a passport appointment and biometric system. Validated booking, payment flow, rescheduling, role-based access, and biometric processes including fingerprint, face verification, passport scanning, document scanning, and signature capture. Ensured data integrity, authentication, and system reliability across multi-role workflows, covering **300+** test scenarios and API/integration test cases with strict approval and biometric compliance.

Brac Bank Website, *Associated with Singularity Limited*

I successfully worked on the Brac Bank new website and admin panel, a completed project with **200+** dynamic pages and **150** products. All components, including buttons, banners, colors, and layouts, are fully configurable. I handled API testing and vulnerability assessments to ensure security and smooth performance.

- **Link:** <https://www.bracbank.com/en> 

Brac Bank Product Selector Tree, *Associated with Singularity Limited*

I successfully tested the Brac Bank Product Selector Tree website, a fully dynamic platform that suggests products like loans, credit cards, accounts, and deposits based on user needs. The admin panel has **4500+** nodes with predefined questions and suggestions, allowing users to easily find the right products. I handled UI, UX, responsiveness, and overall functionality testing to ensure a smooth and user-friendly experience.

B Charge – Smart EV Charging Mobile App (Android & iOS), *Associated with Singularity Limited*

Tested core features of the B Charge app including secure login, nearby station locator, real-time charger availability, booking, cost summary, and charging history. Focused on functionality, usability, and responsiveness to ensure a seamless and user-friendly experience for **EV** users, supporting green mobility.

The Pera App, *Associated with Singularity Limited*

Worked on The Pera App, an in-house project management tool for mobile and web, similar to ClickUp. The platform includes organizations, spaces, boards, tickets, scrum dashboards, attendance, and KPI reports. Responsible for full testing of both app and web to ensure smooth functionality and user experience.

- **Link:** <https://play.google.com/store/apps/details?id=com.singularity.the.pera.app> 

Voice Blaster (BDJobs Web), *Associated with Bdjobs.com*

Tested **1,000+** calls across **5** interview invitation types, covering **20** use cases, using **AI-driven** methods.

Automation of BDJobs Pro Subscription Service, *Associated with Bdjobs.com*

Created a Selenium WebDriver script in Java to automate Bdjobs Pro interactions, including login, navigation, and feature usage on bdjobs.com.

API TESTING USING POSTMAN

Developed CRUD operations with Express.js, MongoDB, and Node.js. Provided a Postman guide for API testing.
